## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is indefinite because the scope of the term "immediate" is unknown. Applicant responds by stating the term means "without delay." But this definition provides no further guidance as it is not clear what would constitute a delay. It is noted that Fig. 1 shows that the fluid must pass from the heater to the cooler via line 21 and therefore, based on the fluid velocity and the length of the pipe, there is some delay.

Claim 10 is indefinite because it is unclear how it further defines claim 9. Applicant responds that the calculation for PU relies on a temperature of 60C. Because no value (not even 60C) is found in either claim 9 or 10, it is not seen that claim 10 changes the scope of claim 9.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Stoutz (U.S. Pat No. 3,394,042)(hereinafter Stoutz) in view of applicants' admissions for the reason set forth in the last Office Action.

***Response to Arguments***

Applicant's arguments filed 03/03/03 and 03/04/03 have been fully considered but they are not persuasive.

Applicant argues that Stoutz does not teach cooling after heating immediately or without delay. In response it is recognized that Stoutz's Fig. 5 (time/temperature graph) and applicant's Fig. 2 appear to be identical, i.e., the temperature reverses its rise without any negligible delay. In view of this fact, it is inherent that Stoutz anticipates the "immediate" limitation, as it is broadly interpreted.

Applicant also argues that the Stoutz process cannot be used to treat beer as UV is harmful to beer flavor. Applicant supplies no evidence to support this argument. It is noted that applicant does not exclude UV heating from the claims. It actually appears from a quick search of the patent literature (see for example, US 6514542, not supplied) that UV can benefit the flavor of beer.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
